

Application No.: 09/914,449

Docket No.: 21900-00034-US

AMENDMENTS TO THE CLAIMS

16. (Currently Amended) A method for preventing bed sore, comprising the steps of:
impregnating threads with a deodorant that deodorizes and also serves as an agent
for removing harmful substances generated by a patient's skin and that stagnates on the patient's
skin to cause bed sore;

weaving a textile material from said threads after graft polymerization; and
arranging said bed sore preventing product made of said textile material selectively on a
portion of a patient's body in contact with a bedding material, or on a surface, or inside of said
bedding material, for preventing and protecting the patient's body from bed sore.

17. (Currently Amended) A bed sore preventing product, manufactured by impregnating
threads with a deodorant that deodorizes and also serving as an agent for removing harmful
substances generated by a patient's skin and that stagnates on the pateient's skin to cause
bed sore, and the product being woven from said threads after graft polymerization.
